

## RECOMMENDED SYSTEM REQUIREMENTS

### Processor/Memory/Operating System

- There is no minimum specification/operating system version required as the BPEC Aptitude Test site is accessed entirely via a browser.

### Internet Connection

- The minimum required internet connection is 2 Mbit/s.
- The internet connection needs to be stable in order for the assessment quiz to perform adequately and the final score to be recorded. A poor or intermittent connection will also cause delayed screen refreshes and countdown clock to pause.

### Browser/Screen Resolution

- Recommended browsers and versions:
  - Internet Explorer version 9 or above.
  - Firefox version 25 or above.
  - Google Chrome version 30 or above.
- The minimum screen resolution required is 1024 x 768 pixels.

*Please note, it may be necessary to use the browser in full-screen mode (by pressing the F11 key) if the entire aptitude test content is not visible.*
- It is recommended to use a browser running on a desktop PC. Accessing the site via a browser running on a tablet or phone device is not recommended because of the need to zoom in and out of the display.
